

The comfortable choice for a compact rotary hammer drill – the BHC 18.

With its outstanding ergonomics, compact design and balanced weight distribution, the cordless rotary hammer drill BHC 18 can be guided firmly even with one hand. At just 2.4 kg it is the lightest tool in its class, which makes a real difference especially for overhead work.

- ▶ As a fixing hammer it is ideal for drilling dowel holes
- ▶ Drill in concrete with pneumatic impact or in tiles without impact
- ▶ With vibration dampening, the BHC offers great working comfort for long periods of non-tiring work
- ▶ All in all, the BHC 18 is the perfect solution for all applications for interior fitouts, on-site installation work, and for fastening tasks
