

The big QUADRILL with powerful torque.

Power drill DR 20

The DR 20 drill is as long-lasting as it is tough, as intelligent as it is exceptional. Use it to drive screws up to 12x300 mm into wood. Drilling holes up to 20 mm in steel and up to 50 mm in wood are no problem at all with the auger bit.

- ▶ Multiple reduction gearing for high torque
- ▶ Ideal for drilling and screwdriving due to interchangeable chuck (no tools required) and screwdriver bit mounting in the spindle
- ▶ Extremely tough and long-lasting due to large collar with reinforced drive shaft and large-sized spindle bearing
- ▶ Clockwise/anti-clockwise operation for driving screws in or removing them
- ▶ Precision keyed chuck with FastFix and clamp lock

QUADRILL

Technical specifications	DR 20 E
Power consumption	1,100 W
Speed (no-load)	0 - 650 rpm
Speed (load)	0 - 400 rpm
Drill Ø (steel/aluminium/wood)	20/28/65 mm
Torque	98 Nm*
Chuck range	3 - 16 mm
Chuck mounting	FastFix
Collar Ø	57 mm
Weight	without/with chuck 2.7/3.4 kg

Package contents | order numbers from page 24 * Electronically limited stalling torque

The linchpin of the QUADRILL DR 20 E is the ingenious FastFix interface, which allows you to adapt the tool to a variety of functions in seconds.
