#### Program Conditions:

- > Discounts are only available through Festool dealers.
- > Tools have to be registered for Service All-inclusive at [www.festool.com.au/sai](http://www.festool.com.au/sai).
- > To be included in the program, schools are required to be a registered educational/training institution.
- > Demonstration and training session will be scheduled and coordinated by a Festool representative.

... We have selected these tools (router, sanders, jigsaws, dust extractors etc) so that we can have an integrated system of tools. The quality of Festool is very high and we try to teach the students to go for quality and safety of machines if they are to buy them in the future. Jim Finlayson, Construction Teach, Design and Technology, VET Building, Aquinas College.

"We often choose Festool tools.... due to their well thought out and executed design, quality of construction, operator comfort, safety features and long service life" Colin Lindberg, Lincombe Collage of TAFE
