

The Innovative Aluminium Composite Specialist System!

Festool's **PF 1200 E saw** is specifically designed to machine precise folding grooves into aluminium composite materials that are used in the commercial cladding and signwriting industries. Together with a guide rail and a Festool dust extractor, you'll get factory quality folds on site quickly and easily.

The unique cutter and roller system (pictured below) ensure that the proper cutting depth is maintained, while the guide rail keeps your cut dead straight. Interchangeable cutters enable external angles of 90° or 135°.

Benefits of the PF 1200 System

- Outstanding results are delivered by this innovative system which is specifically designed for working with aluminium composite materials
- Dead-straight, factory quality cuts and folds on site when used with a guide rail
- Fast, mobile solution - quick set up, easy to use
- Adaptable - 90° and 135° degree bends can be made in a variety of material thicknesses
- Safe - plunge cut action only exposes blade during the cut; excellent extraction removes swarf from the work area
- Smart - MMC electronics give you variable speed, soft start and thermal overload protection
- Peace of mind - Made in Germany to the highest quality standards. Free 3 year warranty available - ask for details

Technical data PF 1200		Scope of delivery PF 1200	Order no.
Wattage	1200 W	PF 1200 E Plus AlucoBond version V-groove cutter 90°, A4 feeler roller, setting gauge for guide rail, operating tool (without guide rail). In a Systainer	574305
No-load speed	1900-5200 rpm		
Router bit diameter/cutting depth	118 mm/ 0-9 mm	PF 1200 E Plus DiBond version V-groove cutter 90°, D3 feeler roller, setting gauge for guide rail, operating tool (without guide rail). In a Systainer	574249
Extraction hose connection	27/36 mm		
Weight	5.4 kg		

System Components:

TS 55 Plunge cut saw

Ideal for cutting aluminium and composite materials, the TS 55 makes dead-straight cuts with the same guide rail as the PF 1200.

CT Extractors

Extremely powerful, incredible capacity and easy to transport, Festool extractors ensure better tool performance and a clean worksite.

Guide rail and accessories

From 800mm to 5 metres long, with a huge range of clever accessories, Festool's guide rails ensure straight cuts - making your job easier,
