WORKPLACE ORGANISATION

Product range

FESTOOL

Tools for the toughest demands

Your workplace: no place for compromise.

Something that is at least as important as a precise electric tool is the organisation of your workspace. Because it holds virtually inexhaustible potential: for optimising your work processes, for minimising setup times and running around, and for significantly greater precision in your finished work.

The crucial questions to be asked are: what are the hallmarks of a well designed workspace – whether in the workshop or on site? How do you cut the time you waste searching for things? How can you significantly minimise costly reworking by the use of accessories designed for the tool and the application? And how is it possible to extend ergonomic principles beyond the tools themselves to the entire working process?

Answers to these questions can't be found on the drawing board, but only by talking with tradespeople in their workplaces. And by taking the approach of not looking at problems in isolation but solving them as parts of an entire system. With the goal of making all work faster, easier and better.

Guide rail

In 1964 Festool's guide rail broke new ground in terms of precision and greater ease of work. It presents a long line of impressive, practical details: the slideway lining, the splinter guard for cuts without splinters, the groove for screw and lever clamps, and the accessory slot for attaching the combination bevel, kickback stop and dual suction pad..

Storage: T-LOC SYSTEMAINER

The T-LOC SYSTEMAINERS can be opened, closed or linked together with just one turn of the latch. Festool's SYSTEMAINER storage system has been setting the standard for functionality ever since 1993. The T-LOC is yet another milestone. And it works with everything else from Festool, forming the perfect system.

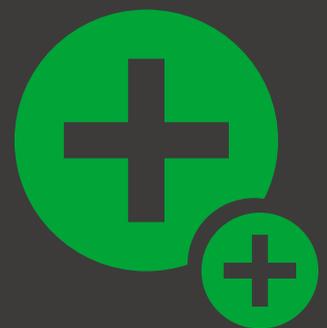

"Made in Germany" quality

Many of our tools have been in use for more than 30 years. That isn't the result of chance, but rather a logical consequence of the painstaking development and production you expect from German-made products. Products backed by our promise: tools for the toughest demands..

After-sales service with a plus

With every warranty registration, Festool customers automatically receive an extra advantage: Festool's after-sales service. Starting with fast repair service, plus a reliable, seven-year supply of spare parts, and three years extended warranty for every new product. To find out more about Festool after-sales service and all the benefits it brings, visit www.festool.com.au

Things **work better** when everything fits together.

Systems get it done.

If you want to be good, you need good tools. If you want to be better, you need a system. A system in which accessories and consumables go hand in hand with the tools, ensuring better order and organisation, and providing extra added value for every investment made.

A system with just one goal: to achieve success faster, easier and with a better result.

System = added value

Added value comes standard every time you invest in a Festool product. Take the guide rail for example: in its primary function it supports you with precision when sawing and routing. Together with the combination bevel, predefined angles can be transferred directly to the workpiece. The guide rail joined with the multifunction table produces a fully functional workstation.

System = seamless work process

Everything is focused on your work: the tools you need are close at hand and ready to use. Dust extraction begins exactly when you start using the tool and stops again as soon as you finish. And it's all centrally controlled via the EAA energy box together with the ASA boom arm. For a larger operating radius, less time spent setting up and running around, and more time for achieving the perfect result.

System = better organised

Those who are better organised reach their goals first. Festool has a comprehensive system to get you there: with Systainers and Sortainers for tidy and organised storage, the Systainer Port and WCR Workcenter for greater mobility, or the Toolcenter as a compact workstation on wheels. All intercompatible and systematically striving to achieve one goal: making every work task that little bit more efficient.

Excellent sorters and organisers.

Simply tidier, easier and better organised. Festool's SYSTAINERS and SORTAINERS.

SYSTAINER/SORTAINER – stackable, connectable, extremely tough and nearly unbreakable.

- ▶ Robust protection – power tools, accessories and supplies are safe from dust, water spillage, impacts and extreme fluctuations in temperature

- ▶ Mobile organisation – with the SYSTAINER/SORTAINER, everything is clearly stored and easy to transport
- ▶ Clearly identified – with labelling fields for inserting either business cards or labels that you can print yourself using the Festool website, at www.festool.com.au/service
- ▶ Can be carried like a briefcase – an insertable extra handle is available (as an accessory) for sizes 1 and 2 of the SYS T-LOC
- ▶ Compatible with the previous Systainer generation

SYS-ToolBox – the open SYSTAINER for quick access.

- ▶ Sturdy construction in high-quality plastic – for up to 7 kg carrying capacity
- ▶ Compatible with the Festool system – a classic tool box which can be connected to a SYSTAINER, mobile dust extractor or another ToolBox

* DF = lid compartment Package contents | order numbers from page 30

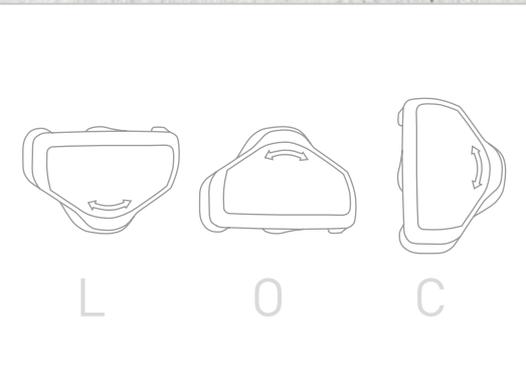

System accessories and consumables from page 30

Everything is quick to hand in the ToolBox – two roomy compartments to keep things tidy, open at the top to allow fast access to hand tools, supplies or accessories.

Keep track of everything – the drawers of the SORTAINER offer plenty of room for small items.

1. Separate compartments with additional labelling option so you always know where things are.
2. From the left or the right: the drawers can be opened from either side for quick access to their contents.
3. The pull-out lock and individual drawer locking prevent drawers being pulled out accidentally.
4. With a range of different sizes and the modular drawer system, there's always a SORTAINER to suit every need.

Three functions combined – the central control element of the T-LOC SYSTAINER. Lock, open, connect with just one turn of the latch.

Securely connected – when linking Systainers together or linking a Systainer with a mobile dust extractor, Systainer Port or Workcenter WCR.

The T-LOC SYSTAINER can always be opened, even when still linked to another.

Effective at moving gear around quickly.

Everything is in its place and always easy to reach. The Systainer Port, the roll board and the Systainer transporter SYS-Roll make for better mobility in the workshop and on site.

SYS-Roll – Systainer transporter that can climb stairs.

- ▶ Up to 100 kg load carrying capacity – dead weight: only 6.5 kg
- ▶ Extra-large wheels (Ø 200 mm) for ease of movement on stairs
- ▶ Strap to hold the SYSTAINERS securely in place
- ▶ Spacer makes it possible to open the top Systainer
- ▶ The integrated drawer (carrying capacity 5 kg) offers room for important small items

Systainer Port SYS-PORT – customised storage.

- ▶ Height-adjustable drawers can be adapted to the height of the Systainers
- ▶ Moveable in every direction – due to castors with ball bearings
- ▶ Well secured – with non-slip rubber top surface, drawers which lock shut when one is open, security lock, and a locking brake to prevent the Port inadvertently rolling away (also a feature of the roll board)

Roll board SYS-Cart – compact, easily steered, fast.

- ▶ For easy transport of Systainers in sizes 1–5 and Sortainers
- ▶ Suitable for all level surfaces or long paths
- ▶ Up to 100 kg load carrying capacity, with large, fixable castors (Ø 100 mm)
- ▶ Locks onto the bottom Systainer for a secure connection

SYS-PORT

How many SYSTAINERS fit into a SYS-PORT?

| SYSTAINER size | SYS-PORT 500/2 | | | | | | SYS-PORT 1000/2 SYS-Roll | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |

* DF = lid compartment ** The SYS-PORT 500/2 is supplied with 3 drawers, the SYS-PORT 1000/2 with 5 drawers Package contents | order numbers from page 30

System accessories and consumables from page 30

Easy access – due to the fully extendable drawers every SYSTAINER can be opened or removed from the Systainer Port.

No problems, even in narrow spaces – the roll board's dimensions are only slightly larger than those of the SYSTAINER/SORTAINER.

Roll up to 100 kg and avoid exhaustion and back problems from carrying – even on stairs or rough terrain, due to the large wheels.

Multifunction table MFT 3

1 table. 1000 possibilities.

Create a professional working set up even on a construction site. Its flexible options for clamping and working on large and small workpieces probably make the MFT 3 multifunction table the world's most versatile worktop.

- ▶ Extremely high precision – with an aluminium track surrounding the worktop on all sides, for attaching a guide rail and the mitre guide
- ▶ Maximum grip – flexible and secure clamping using the hole grid together with special-purpose fixed clamps and F-clamps
- ▶ Gentle on your back while working – the 90 cm work surface height means it is comfortable even for taller users
- ▶ Simple to extend – the MFT 3 can be joined with another MFT 3, or with the CMS compact module system and accessories by using the V groove
- ▶ Easy to transport – the MFT 3 can be quickly folded up, making it ideal for users who are on the move

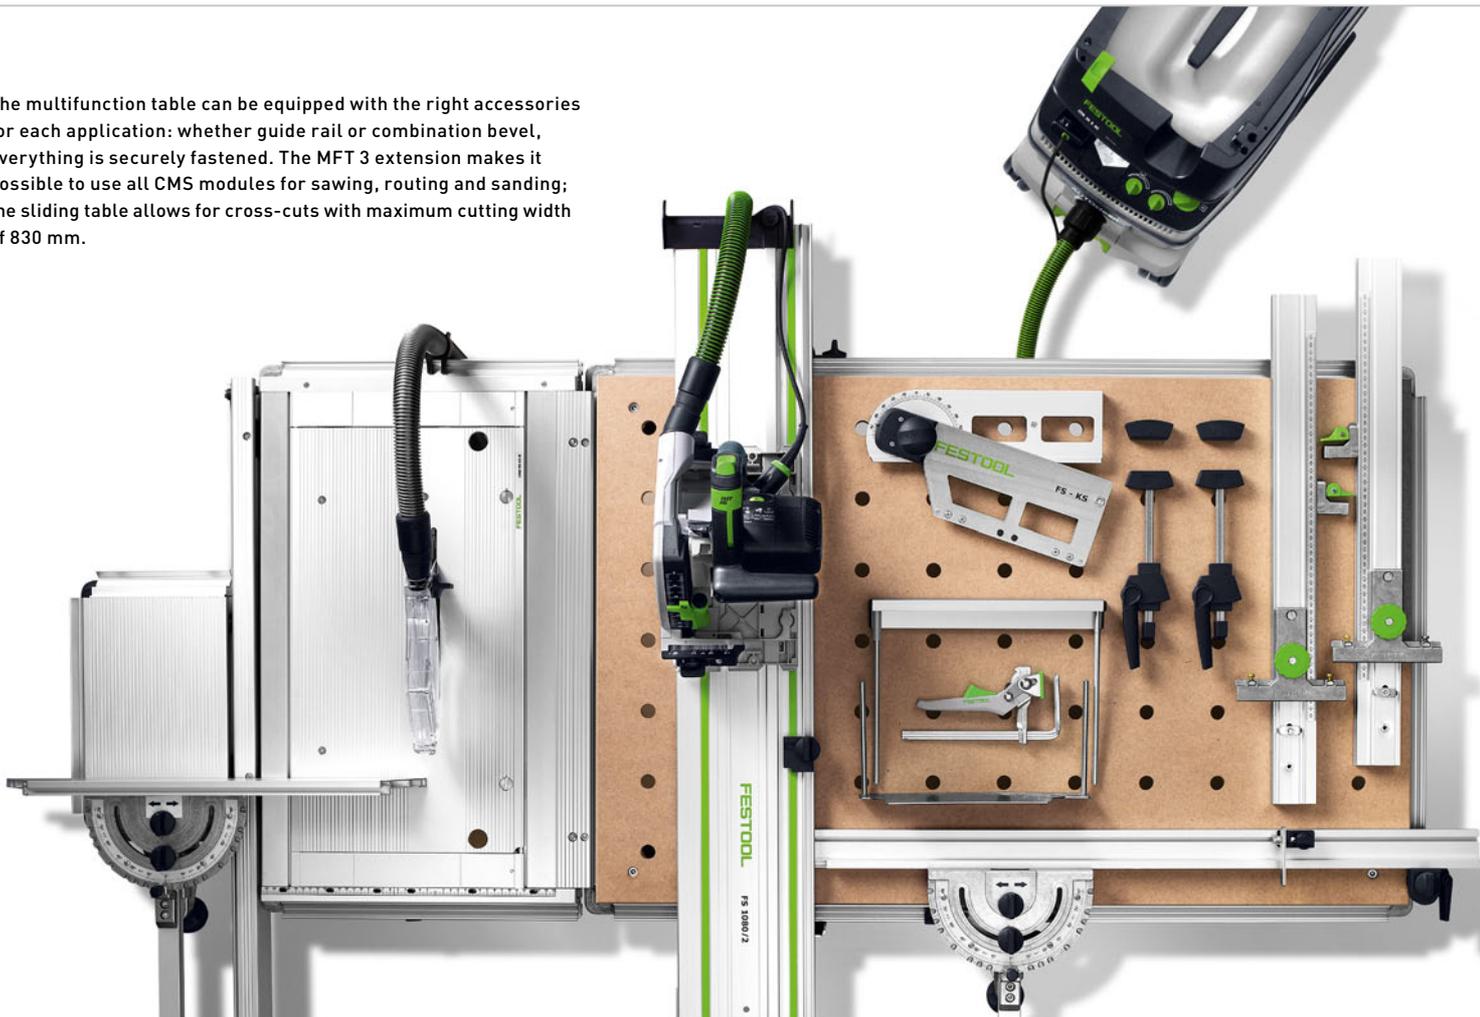

MFT 3

| Technical data | MFT 3 |
|------------------------------|-----------------|
| Working height (folded away) | 900 mm (180 mm) |
| Overall dimensions | 1,157 x 773 mm |
| Working surface | 1,102 x 718 mm |
| Maximum workpiece thickness | 78 mm |
| Max. workpiece width | 700 mm |
| Hole diameter | 20 mm |
| Hole grid spacing | 96 mm |
| Load capacity | 120 kg |
| Weight | 28 kg |

Package contents | order numbers from page 22

The multifunction table can be equipped with the right accessories for each application: whether guide rail or combination level, everything is securely fastened. The MFT 3 extension makes it possible to use all CMS modules for sawing, routing and sanding; the sliding table allows for cross-cuts with maximum cutting width of 830 mm.

Whether large or small, angular or round, horizontal or vertical – difficult workpieces are easy to clamp on the MFT 3.

Link to the rest of the system – an adapter plate allows the VAC SYS vacuum clamping system to be joined to the MFT 3 and simply flipped down when not in use.

Precision in every situation – due to secure guidance, mitre guide, adjustable stop and additional clamp. The guide rail can be adjusted for materials of a range of thicknesses.

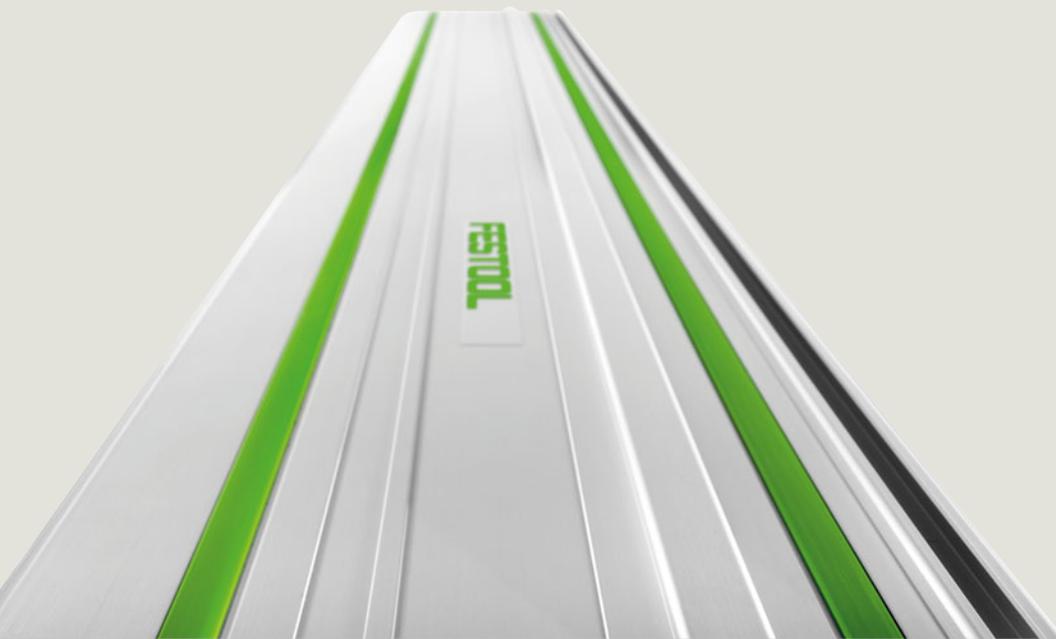

Guide rail FS

Flawless **guidance.**

Invented and perfected by Festool: the guide rail. For precise straight cuts and grooves. With slideway lining to keep the tools gliding smoothly, a slot for screw and lever clamps, or the splinter guard for cuts free of tear-out.

- ▶ Zero-play guidance – the plunge cut saws' guidance jaws can be adjusted on the guide rail without using tools
- ▶ Cuts free of chips or splinters – the rubber lip positioned directly along the scribe line prevents tear-out along the edges, even with angled cuts
- ▶ Accurate work – the guide stop for routers is designed for precise grooves
- ▶ Simple transfer of angles – with combination bevel and guide rail
- ▶ Rows of holes made easy – the guide rail with hole spacing is available for shelving and furniture assembly

FS

Fast diagonal cuts – with guide rail and combination bevel, angles can be transferred easily to the workpiece or wall.

Simply precise – the width of the workpiece can be conveniently adjusted using the parallel side fence with scale and adjustable stop.

Vital for furniture building – router and guide rail with positioning holes make for easy work on shelving systems or fittings.

Dual suction pad GECKO

Solid hold, easy release.

Works using suction, without leaving marks. The GECKO dual suction pad – for easy and secure transport even of awkwardly shaped workpieces, or for mounting the guide rail on smooth surfaces.

- ▶ Ergonomic – the twist-resistant handle makes lifting loads noticeably easier
- ▶ Keeps in position without harming the material – specially fitted sliding rings on both suction cups allow the GECKO to be positioned precisely and released again just as easily
- ▶ Firm hold – the green clamping levers provide quick and reliable suction
- ▶ Part of our integrated system – with the guide rail adapter you can attach the GECKO directly to guide rails

GECKO

Smooth and awkward workpieces can be carried comfortably and safely with the GECKO.

Simple and quick to install – the adapter for attaching the guide rail.

Makes laying floors considerably easier.

Vacuum clamping system VAC SYS

Maximum flexibility all round.

Work on pieces from all sides in a single step – surfaces and edges – without re-clamping. VAC SYS means fast, easy, ergonomic work.

- ▶ Powerful hold – items up to 30 kg and 1 x 1 m can be firmly secured on each clamping unit
- ▶ Gentle on the material – the pads are made from soft and flexible plastic – even sensitive surfaces can be clamped
- ▶ Everything under control – you can use the foot valve to release the vacuum pad while holding the workpiece in your hands
- ▶ Standing firm – regardless of the base surface, the VAC SYS locks firmly onto it by suction, or can be held in place by screw clamps
- ▶ Portable – the pump and clamping units are housed in the SYSTAINER for easy transport

VAC SYS

| Technical data | VAC SYS |
|---|--|
| Pump capacity* | 2.7 m³/h at 50 Hz, 3.5 m³/h at 60 Hz |
| Voltage | 220–240 V |
| Insulation class | F |
| Noise level | 55 dB (A) |
| Dimensions (L x W x H) | 395 x 295 x 210 mm (SYSTAINER SYS 3) |
| Weight VAC SYS VP | 8.0 kg |
| Operating and storage conditions (temp./humidity)** | 0° C to +50° C / 30% to 95% |
| Minimum vacuum | ≥ 810 mbar/ ≥ 81 % |
| Power consumption | 160–200 W at 50 Hz, 200–230 W at 60 Hz |
| Speed | 2,800 rpm at 50 Hz, 3,300 rpm at 60 Hz |
| Running time under normal conditions | 5,000–8,000 hours |

* Do not use pump at altitudes higher than 2000 m above sea level ** Duration of the extreme weather condition: 30 days Package contents | order numbers from page 22
 Vacuum pads available in the sizes D 215mm [round], 200 x 60 mm [oval], 277 x 32 mm [narrow], 275 x 100 mm [oval]

Cups can be changed without using tools – for different workpieces there are four cup sizes to choose from, which can be changed quickly with FastFix.

Double the power – you can connect a second clamping unit to the VAC SYS pump for pieces that are especially large, heavy or curved.

Work on pieces from all sides – they can be rotated through 360° and pivoted up to 90°. So you can work ergonomically without re-clamping.

Energy box EAA | Boom arm ASA

For more **freedom of movement.**

Expanded operating radius and central control: with the EAA energy box and the ASA boom arm. It keeps tools within reach, and supplies power and extracts dust automatically. For greater mobility and efficiency in your work.

- ▶ Manually adjustable – opening the valve activates dust extraction wherever an electric and/or air tool is in use
- ▶ Flexible – the EAA can be mounted on the ceiling, wall or the boom arm
- ▶ Ready for immediate use – two electric or air tools can be hung directly on the housing of the EAA

EAA

| Technical data | EAA-EW* | EAA-EW/DW* |
|----------------|--------------------|--------------------|
| Dimensions | 506 x 580 x 367 mm | 516 x 580 x 367 mm |

| Connecting line length | Approx. 3 m | Approx. 3 m | Approx. 3 m |
| Weight | 55 kg | 77 kg | 85 kg |

* EW= electric tool DW= air tool

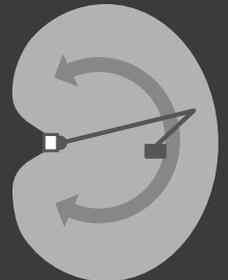

** Depends whether mounted on wall or on pillar Package contents | order numbers from page 26

System accessories and consumables from page 26

Wall mounting

Pillar mounting

The ASA boom arm gives you a greater operating range, allows centralised power supply and dust extraction, and keeps tools at the ready wherever they are needed.

- ▶ Large range of use – expanded operating radius of 9-84 m², with high manoeuvrability provided by the double jointing on the ASA 5000/6000
- ▶ Part of a mobile system – suitable for use with Festool CT/SRM mobile dust extractors
- ▶ Stable and light – aluminium members make the ASA light and virtually torsion-free
- ▶ Variable – wall and pillar mounting possible

Safer and tidier – two hoses can be stored neatly on the hose holders on the back of the EAA.

The choice is yours – with the switch in the “MAN” position, dust extraction is started manually when the EAA is switched on. In “AUTO” position, it starts when the power tool is switched on. And in “0” position all that is activated is the power supply via the socket with continuous power.

ASA

Workcenter WCR 1000

Mobility at its most compact.

The compact and mobile way to work: the Workcenter WCR 1000 can be connected to any Festool mobile dust extractor with integrated Sys-Dock*. It holds your tools, accessories and supplies so you can easily find them when needed.

- ▶ Flexible configuration – hooks for two power tools with extractor hoses, universal holder, storage compartment, and a swivelling tray for small parts
- ▶ Customised expansion – you can equip the pegboard and profiled slot with additional trays, hooks and holders
- ▶ Work without back strain – the height of Workcenter, hooks and trays can be adjusted easily
- ▶ Customised loading – SYSTAINERS sizes 1 to 4 or SORTAINERS can be integrated into the Workcenter (not included)
- ▶ Everything has its own place – bottles or cloths can be hung from plastic eyelets, while the large, swivelling tray is ideal for small tools and sundries

* Except for CT MINI/CT MIDI

WCR 1000

| Technical data | | WCR 1000 |
|--------------------------|--------------------------|-----------------|
| Dimensions | Total length | 1,050 mm |
| | Length of base plate | 600 mm |
| | Width | 362 mm |
| | Height, min. | 545 mm |
| | Height, max. | 785 mm |
| Weight | | approx. 10.2 kg |
| Max. load on tray | | 5 kg |
| Sizing of pegboard holes | Size of each square hole | 9.2 x 9.2 mm |
| | Hole spacing, vertical | 38.1 mm |
| | Hole spacing, horizontal | 38.1 mm |

Package contents | order numbers from page 28

Fits all dust extractors CT 22-55, CLEANTEX CT 26/36/48 and the special application dust extractors CTH 26/48

Profiled slot to hold universal hooks and tool hooks – height-adjustable in the slot.

Better organised for **faster work.**

Everything within easy reach instead of walking all over the place: these smart, mobile organisers give you all the equipment you need, exactly where you need it.

- ▶ Combination of tray, shelf and lockable compartment
- ▶ Mobile, sturdy and secure with locking brake
- ▶ Flexible expansion with SYSTAINER

Universal center UCR 1000 – everything within reach.

- ▶ Mobile working – benefit from all the advantages of the Workcenter WCR 1000
- ▶ Well organised – hooks and trays ensure quick access to power tools, accessories and supplies

Multifunction stool MFH 1000 – comfortable and convenient.

- ▶ Pleasant working – without the Workcenter WCR you have a stable, comfortable place to sit

UCR 1000

Lockable, full-extension drawer – for accessories, supplies and personal items

| Technical data | | UCR 1000 |
|---|---|----------------------|
| Dimensions (length x width x height) | Retracted | 695 x 436 x 1,031 mm |
| | Extended | 695 x 436 x 1,271 mm |
| Weight | | 35.5 kg |
| Maximum loading | In drawer, tray and on pegboard on MFH + on WCR | 20 kg + 30 kg |

| Technical data | | MFH 1000 |
|---|---|--------------------|
| Dimensions (length x width x height) | | 695 x 436 x 524 mm |
| Weight | | 25.55 kg |
| Maximum loading | In drawer, tray and on pegboard + on seat surface | 20 kg + 120 kg |

Package contents | order numbers from page 28

Toolcenter TC 3000/2

Flexibility plus a surface to work on.

Occupying 0.4 m²: the Toolcenter is a mobile workstation where even the dust extractor can be quickly integrated via the extractor dock.

- ▶ Organised to your advantage – tools, materials and dust extractor are always stored tidily and within easy reach
- ▶ Mobile equipment – easy to transport between various locations in the workshop
- ▶ Firm hold – the dust extractor is secured in place by the extractor dock
- ▶ Security included – lockable cabinet section for SYSTAINERS up to size 3 for storage of power tools and accessories
- ▶ More space – holders for hoses and equipment keep the tray surface free for tools and supplies

TC 3000/2

| Technical data | TC 3000/2 |
|--------------------------------------|----------------------|
| Dimensions (length x width x height) | 470 x 1,070 x 960 mm |
| Tray storage area | 460 x 990 mm |
| Storage area working height | 925 mm |
| Weight | 43 kg |

Package contents | order numbers from page 26

Option of attaching all dust extractors CT 22/26/33/36; SR 200, SR 45 with strap

Clearly organised – the abrasives can be arranged on the rear panel where they are within easy reach when needed.

Compact work light SYSLITE

Lighting your way.

Flexible standing or hanging options: the SYSLITE brings light into every corner, for up to six hours non-stop. Its casing is made from fracture-, shock- and impact-resistant die-cast aluminium – tough enough for any work site. The wide beam angle of 170° lights up the working surface evenly over a wide area. For precise work and top results.

- ▶ Outstanding light output with six high-power LEDs and the choice between intensive and dimmed light
- ▶ Long-life and hard-wearing due to impact-resistant enclosure
- ▶ Maximum readiness for use – in addition to the internal rechargeable battery, you can also connect all Festool battery packs
- ▶ Reduced risk of accidents as there are no cables to trip over

5 different setup positions:

SYSLITE

Modelled on daylight – even lighting over a wide area.

| Technical data | SYSLITE | |

Traditional torch – circular; the glare of the “lens flare” is tiring for the eye.

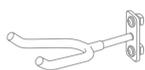

Conventional work light – better light distribution, but with yellowish tone and optical deterioration around the edges.

The Festool SYSLITE – evenly dispersed lighting over a wide area, modelled on daylight.

More system accessories and consumables are available at www.festool.com.au or www.festool.co.nz or in the main catalogue.
