

# CORDLESS YOU CAN COUNT ON

## BUILD TO LAST

Whether personal preferences or application-specific requirements, you will no doubt have certain standards for your tool. What if, instead of trying to find endless compromises, a solution existed that combined everything into one and made every day work noticeably easier?

### FOR GREATER EASE WHEN WORKING

#### 1 Festool = quality

When other options break down or fail, your Festool cordless tools will still be going strong. How? Festool's rigorous testing process, high design standards, and over 90 years' experience pioneering high performing tools. This means you get better results, longer uninterrupted working, and far lower tool-replacement costs.

#### 2 High-tech brushless motors

The ever-dependable EC-TEC brushless motor generates a tremendous amount of power while hardly consuming any energy. Paired with smart electronics that automatically adjust and match tool speed to the working material, you get top-notch results while saving on battery juice.

#### 3 Engineered for the toughest jobs

Yes, the cordless tools are of high quality, but that doesn't make them 'soft'. It's quite the opposite. The smarter the design and technology, the more robust the tool is. Festool demands every tool to pass through extensive, bruising product testing before they're released to the market, so you can be 100% sure they're up to the task and can cop a few knocks along the way.

#### 4 Dust-free working

Dust extraction is at the core of the Festool System, and the cordless range is no exception. Harness Bluetooth® batteries to connect cordless tools to an extractor, so the tool and extractor fire-up at the same time. Having the extractor running either side of your cutting/ grinding means you're fully protected from harmful dust exposure.

#### 5 Bluetooth® convenience

Festool tools make work easy. The innovative Bluetooth® system makes it easier again! Our Bluetooth® batteries offer the unique feature of 'following the tool', so you pair the battery and extractor once and then can move the battery between tools without needing to re-connect.

#### 6 Get the maximum result

Just like a burger is better with chips and a drink, Festool tools are better with accessories and a dust extractor. Our cordless tools are available with a massive range of accessories perfectly designed for specific jobs of yours. Throw an extractor into the mix that cleans as you work and protects your lungs, and you've got a fully optimised setup that lets you work faster, easier and better. And guess what? That'll save you time and money in the long run.

### TAILOR-MADE CORDLESS SOLUTIONS

#### Hammer Drill

With vibration damping and a weight of just 2.5 kg, the BHC 18 the cordless hammer drill is the solution for maximum drilling comfort. The Bluetooth® battery packs\* start the mobile dust extractor automatically for dust-free, comfortable working with a drilling dust nozzle.

#### Multi-Tools

Festool is proud to present the OSC VECTURO 18V Starlock Cordless Oscillator Basic in Systemer — Australia's best multi-tool for sale that offers the greatest precision at maximum performance. The VECTURO offers precise cutouts on the scribe mark, precisely guided plunge cuts on delicate surfaces and working with minimal dust generation, even above head height.

#### Cordless Sander

Perfect for corners and edges. With the iron-shaped sanding pad, the DTSC cordless delta sander delivers the best sanding results even in tight spots. And the 18 V Bluetooth® Ergo battery pack\* in combination with the brushless EC-TEC motor provides plenty of power, similar to that of a mains-powered tool.

### TYPE OF INDUSTRIES WHERE A TRADESMAN CAN USE FESTOOL CORDLESS TOOLS

- Joinery
- Cabinetmaking
- Residential Building
- Carpentry
- Plastering
- Restoration
- Painting

### BATTERY FEATURES

#### 3 Year Warranty

Finally, some terms and conditions where batteries and chargers ARE included! It's unique to have batteries/chargers covered under any warranty, let alone a 3-year warranty, but that's precisely what Festool offers. Every type of Festool battery and charger, fully covered for 3 years. This is part of our top-class service offering and means you have one less thing to worry about. That's cordless you can count on.

#### High-performance battery pack

Within the range is the Li-HighPower Compact 4.0 Ah battery pack that makes your work truly effortless. At just 600g, it's 20% lighter and 50% more compact than a 5.2 Ah battery pack – saving on weight, but not on performance. It is suitable for most 18V tools, where the focus is on compactness and ease.

#### AIRSTREAM & Bluetooth technology

Exclusive to Festool, AIRSTREAM technology is a ventilation system built into the batteries and chargers that funnels cool air around all internal elements. This keeps everything much cooler, which gives you faster charging and longer battery life. Festool has a selection of Bluetooth® batteries that let you pair the tool to a dust extractor and operate it automatically. Uniquely, Festool Bluetooth® batteries only need to be paired once and then can be used on multiple tools.
