

## The specialists for timber construction.

Thoroughly and consistently engineered: you can rely on Festool's electric carpentry tools for powerful, tireless and precise performance on timber framework and when renovating and refurbishing wooden structures. Whether you are cutting compression-resistant insulation to size or planing wide beams, Festool has the right tool for every application. So you can get your work done efficiently, reliably and safely.

### Technical highlights

- ▶ Sword saws: precise cuts on the guide rail to depths of 330 mm
- ▶ Three carpentry machines in one, skew notcher / tenon cutter. the HK 132
- ▶ Beam planer with turbo chip ejection for a clear view of your work
- ▶ Chain mortiser with precise guidance due to large side stop with precise adjustment

## UNIVERS & IS 330

UNIVERS and IS 330: **Precise cuts with ease – the sword saws.**

Precise, light, deep - precision cutting of wood and insulation material.

>>> from page 76

## HK 132 E

HK 132 E: **Three carpentry machines in one.**

Sawing, notching, and tenon cutting – the all-rounder among carpentry tools, easily converting for use in three different kinds of applications.

>>> from page 78

## PL 205/245 E

PL 205/245 E: **Strong and broad for smooth surfaces.**

The beam planer for clean and smooth surfaces, producing a superb planed finish.

>>> from page 80

## CM 150

CM 150: **Compact design, optimal weight.**

The chain mortiser is especially easy to handle, making it ideal for work directly on construction sites.

>>> from page 81

## UNIVERS sword saw SSU 200 EB.

### The innovative all-rounder.

The sword saw with a cutting depth of 200 mm for cutting wood and compression-resistant insulation material to size.

- ▶ Ideal for on-site use: 200 mm cutting depth with a weight of 6.5 kg
- ▶ Precise cuts owing to an integrated guide slot in the die-cast aluminium base for use with the guide rail
- ▶ Many applications for mitre cuts up to 60°
- ▶ Chain can be replaced and tensioned without the use of tools
- ▶ Rotating connector for attaching a dust extractor (e.g. CTL 48, CTL 36)
- ▶ Pull cutting action for swift and smooth work and excellent cut quality
- ▶ Advanced power electronics for constant power while sawing
- ▶ Various chain sets to achieve the best cut in wood and insulation materials

Technical specifications	SSU 200 EB
Rated input power	1,600 W
Cutting depth at 0°, 90°/45°/60°	200/140/100 mm
Mitre cuts	0 - 60°
Speed (no-load)	4,600 rpm
Chain speed	10.6 m/s
Blade position	0-10°
Mains cable	7.5 m
Weight	6.5 kg

Package contents | order numbers from page 82

# UNIVERS

## Sword saw IS 330 EB.

### The easy way to cut insulation material.

The insulation saw with a cutting depth of 330 mm for cutting compression-resistant insulation material to size.

- ▶ Ideal for construction sites: cutting even the thickest insulation materials thanks to a cutting depth of 330 mm and weight of 7.0 kg
- ▶ 60° mitre cuts with a cutting depth of 165 mm
- ▶ Perfectly straight cuts free of tear-out thanks to the guide rail
- ▶ Chain can be replaced and tensioned without the use of tools
- ▶ Rotating connector for attaching a dust extractor (e.g. CTL 48, CTL 36)
- ▶ Pull cutting action for swift and smooth work and excellent cut quality
- ▶ Important: Cannot be used for wood/timber

Technical specifications	IS 330 EB
Rated input power	1,600 W
Cutting depth at 0°, 90°/45°/60°	330/230/165 mm
Mitre cuts	0 - 60°
Speed (no-load)	4,600 rpm
Chain speed	12 m/s
Blade position	0 - 10°
Mains cable	7.5 m
Weight	7.0 kg

Package contents | order numbers from page 82

# IS 330

Top quality cuts in all materials:

Top quality cuts in all compression-resistant insulation materials:

# Circular saw HK 132 E.

## Three carpentry machines in one.

### The hand-held circular saw HK 132.

- ▶ Remote operation of the retractable blade guard for smooth cut entry, even with mitre cuts
- ▶ Precise mitre cuts up to 60° with stable pivot bearing and exact scale
- ▶ Electronics for smooth operation: soft start, constant rpm, overload protection, and monitoring of motor winding temperature

### The skew notcher fitting RS-HK 160x80 and the tenon cutter fitting NS-HK 250x50 for use with the HK 132.

- ▶ Safe handling with two guards to cover the skew notcher or tenon cutter head.
- ▶ Smooth running due to dynamic balancing of the skew notcher/tenon cutter head.
- ▶ Carbide reversible blades and pre-cutters for high surface quality and fast work progress.
- ▶ Precision clamping bars for quick and easy blade changes.

Skew notcher fitting

Tenon cutter fitting

Technical specifications	HK 132 E
Power consumption	2,300 W
Cutting depth at 0°; 90°	50-132 mm
Cutting depth at 45°/60°	85/50 mm
Mitre cuts	0 - 60°
Speed (no-load)	2,200 rpm
Blade dimensions	350 x 30/3.5 mm
Weight	18 kg

Package contents | order numbers from page 83

Technical specifications	RS-HK 160x80
Skew notcher head Ø	160 x 80 mm
Centre bore Ø	30 mm
Pin holes Ø	7 mm/ pitch circle 42 mm
Cutting width	80 mm
Cutting depth	0 - 38 mm
Max. inclination	45°
Reversible carbide blade	80 x 13 x 2.2 mm
Carbide pre-cutter	14 x 14 x 2.0 mm
Weight	7.1 kg

Package contents | order numbers from page 83

Technical specifications	NS-HK 250x50
Tenon cutter head Ø	250 x 50 mm
Centre bore Ø	30 mm
Pin holes Ø	7 mm/ pitch circle 42 mm
Cutting width	50 mm
Cutting depth	0 - 80 mm
Reversible carbide blade	50 x 12 x 1.5 mm
Carbide pre-cutter	14 x 14 x 2.0 mm
Weight	6.8 kg

Package contents | order numbers from page 83

The circular saw with a cutting depth of 132 mm. The high-power 2,300 watt motor ensures high cutting speed and fast work. The saw can also be pivoted to any angle up to 60° for extreme mitre cuts.

Out with the saw blade, in with the skew notcher head. The skew notcher cutter fitting easily turns your heavy-duty saw into a reliable skew notcher cutter.

It's just as easy to convert the HK 132 to a tenon cutter. Out with the saw blade, in with the tenon cutter head, and you have a tool for applying tenons to an entire series of beams or for creating lap joints.

## Beam planers PL 205 E and PL 245 E. Strong and broad for smooth surfaces.

The beam planer with turbo chip ejection and planing width of 205 mm or 245 mm.

- ▶ Ideal handle arrangement and long plane soles for secure guidance
- ▶ Turbo ejection system for outstanding chip ejection and a clear view of the workpiece
- ▶ Ideal planing depth setting by rotating the additional handle
- ▶ V-groove in the sole for easy handling when chamfering beams
- ▶ Precise guidance with guide roller for full utilisation of the planing width
- ▶ Electronics for smooth operation: soft start, run-out brake, constant rpm and overload protection

Technical specifications	PL 205 E	PL 245 E
Power consumption	2,000 W	2,300 W
Max. planing width	205 mm	245 mm
Adjustable planing depth	0 - 3 mm	0 - 3 mm
Speed (no-load)	13500 rpm	13,000 rpm
Weight	13 kg	15.7 kg

Package contents | order numbers from page 84

## Chain mortiser CM 150. Compact design, optimal weight.

The compact design and low weight of the CM 150 chain mortiser make it especially easy to use and therefore ideal during roof space conversions, when renovating and refurbishing old buildings or when erecting a roof truss, if adjustments or reworking become necessary on the site. With its large, sturdy side stop, the chain mortiser can be guided securely even when working overhead or on installed beams.

- ▶ Precise guidance due to large side stop with precise adjustment
- ▶ Powerful motor for high torque
- ▶ Easy to handle due to compact design and optimal weight

Technical specifications	CM 150
Power consumption	2,000 W
Mortise depth	100/150 mm
Range of adjustment of side stop	0 - 150 mm
Chain sprocket speed	4,250 rpm
Weight	8.5 kg

Package contents | order numbers from page 85
